Safety and environment

The safety of our people and the protection of the environment are top priorities at xxxx. We have placed health, safety, security and environment (HSSE) at the core of our business philosophy, ensuring we do all that we can to operate a safe and secure workplace and minimise the impact of our activities on the communities in which we operate as well as the wider environment.

In 2012 we now have in place:

- dedicated HSSE leadership networks across all areas of our business
- a five-year [Global HSSE Strategy](#) [link to 2.2.1.]
- a detailed [Global HSSE Management System](#), [link to 2.2.1.] comprising 11 key elements and expectations
- [performance management processes, tools and systems](#) [link to 2.2.3. Reporting and performance]
- a Crisis and Emergency Management (CEM) system
- training standards and programmes, including:
 - self-assessment training
 - Process Hazard Analysis (PHA) training for field operations personnel
 - Non-Destructive Visual Testing training for integrity specialists
- certification programmes in all our geographic areas:
 - environment (e.g. ISO 14000),
 - health & safety (e.g. OHSAS 18001)
 - quality management (e.g. ISO 9001)
- environmental initiatives, including:
 - greenhouse gas emission reduction programme
 - energy efficiency and resource conservation
 - waste management programmes
 - remediation, reclamation and restoration programmes to minimise land-based impacts of our business

Our HSSE principles

We manage all of our business operations according to the following principles:

- To comply with all applicable laws and regulations; making use of international and industry standards and best practices where appropriate.
